

# Accounts Combined module

for openCart 3.0.x

## Installation Instructions

Works with openCart 3.0.x

1. Either download the .zip and upload it in *Admin > Extensions > Installer*, or install directly from *Admin > Marketplace*
2. Refresh modifications in *Admin > Extensions > Modifications*
3. In *Admin > Extensions > Modules*, click **Install**, then **Edit**, configure and Enable

To uninstall:

1. In *Admin > Extensions > Modules*, click **Uninstall**
2. Delete entry for .zip in *Admin > Extensions > Installer*
3. Refresh modifications in *Admin > Extensions > Modifications*

For technical support please email at [opencart@phpgods.net](mailto:opencart@phpgods.net) with you site information and admin access. Include your FTP account information. The module is supposed to work with original openCart, and even though compatibility issues are very unlikely to occur, there is no guarantee that it will work with other extensions, modules, modification or themes.

This module is included in [Affiliate Pack X](#) and is compatible with all extensions in the pack.

**PLEASE DO NOT POST SUPPORT REQUESTS IN THE OPENCART.COM PAGE COMMENTS!**

## User Guide

This module removes separate customer / affiliate registration. Both customer registration forms, account/register and checkout/register, can include a checkbox to become affiliate and all affiliate-specific fields. Affiliate registration page (affiliate/register) redirects to account/register.

### **Affiliate Fields and Forms**

Each affiliate field (Website, Tax, Payment, Company) can be removed if you don't need it, or can be required (registration won't be complete until those fields are filled in). You can select *Default Payment* method, remove any payment method you don't need (Cheque, PayPal, Bank), or any bank field you don't need.

There are 2 pages with registration forms – *account/register* and *checkout/register*. Each of these pages has its' own settings. For each form you can choose to create affiliate account always or never, or let the user decide – in that case the form contains a checkbox for affiliate account. You can also hide any field from particular form, and ask users to agree to Affiliate Terms.

### **Misc. Settings**

Module Edit page in Administration has following settings:

- **Allow Own Affiliate links** - customers can use their own affiliate links when buying and receive commission for their own purchases, this is set to Yes by default.

- **Set affiliate's tracking code as their own tracking** – when this is set to Yes, customer account tracking will be set to their own affiliate account tracking code, so they can receive commission for their own orders. This is No by default.
- **Customer Group** – customers can be assigned to a certain customer group when they become affiliates, and also you can instantly assign selected customer group to all existing customers who are also affiliates – this can be useful, for example, if you have several such customers before installing the module.
