

# Affiliate Transactions for openCart 3

## Installation Instructions

Works with openCart 3.0.x

1. Either download the .zip and upload it in *Admin > Extensions > Installer*, or install directly from *Admin > Marketplace*
2. Refresh modifications in *Admin > Extensions > Modifications*
3. In *Admin > Extensions > Modules*, click **Install**, then **Edit**, configure and Enable

To uninstall:

1. In *Admin > Extensions > Modules*, click **Uninstall**
2. Delete entry for .zip in *Admin > Extensions > Installer*
3. Refresh modifications in *Admin > Extensions > Modifications*

For technical support please email [opencart@phpgods.net](mailto:opencart@phpgods.net) with you site information and admin access. Include your FTP account information. The module is supposed to work with original openCart, and even though compatibility issues are very unlikely to occur, there is no guarantee that it will work with other extensions, modules, modification or themes.

This module is included in [Affiliate Pack X](#) and is compatible with all extensions in the pack. It is also included with [Customer and Affiliate Accounts Combined](#) and [Advanced Multi Level Affiliate System](#).

**PLEASE DO NOT POST SUPPORT REQUESTS IN THE OPENCART.COM PAGE COMMENTS!**

## User Guide

This module brings back separate affiliate transactions, as they used to work in openCart 1 and 2. *Admin > Extensions > Modules > Edit Affiliate Transaction module* has a setting **Separate Affiliate Transactions from Customer Transactions (Store Credits)** . If it is set to **Yes**, affiliate transactions are stored separately from Store Credits, have separate balance, and can be viewed separately in Admin on Customers > Edit page – Transactions tab, and in Customer account on the Transactions page. You can switch view from transactions to credits and back with a dropdown box at the top of the table.

Converting affiliate transactions to Store Credits is still possible with **Convert affiliate earnings to Store Credits** setting set to **Yes**. It will preserve full transaction history, by adding positive and then negative affiliate transaction, and then a customer transaction (Store Credits). This function can be automatic, or can be performed manually by customers on their Transactions page – in that case they can convert any part of their current affiliate balance to Store Credits at any moment.

Affiliate earnings to Store Credits ratio does not have to be 1:1, different ratio is possible with **Multiply transferred affiliate earnings by** setting in Admin set to some other value. For example, \$1 of earnings could become 1.5 credits by setting it to 1.5.

Also, **Affiliate Transaction Report** page is added in *Admin > Reports*.
