

Discount for Referred Customers

For openCart 3.0.x

Installation Instructions

Works with openCart 3.0.x

1. Either download the .zip and upload it in *Admin > Extensions > Installer*, or install directly from *Admin > Marketplace*
2. Refresh modifications in *Admin > Extensions > Modifications*
3. In *Admin > Extensions > Order Totals*, click **Install**, then **Edit**, configure and Enable

To uninstall:

1. In *Admin > Extensions > Order Totals*, click **Uninstall**
2. Delete entry for .zip in *Admin > Extensions > Installer*
3. Refresh modifications in *Admin > Extensions > Modifications*

For technical support please email opencart@phpgods.net with you site information and admin access. Include your FTP account information. The module is supposed to work with original openCart, and even though compatibility issues are very unlikely to occur, there is no guarantee that it will work with other extensions, modules, modification or themes.

This module is included in [Affiliate Pack X](#) and is compatible with all extensions in the pack.

PLEASE DO NOT POST SUPPORT REQUESTS IN THE OPENCART.COM PAGE COMMENTS!

User Guide

This extension is **Order Total**, and can be found in *Admin > Extensions > Order Totals*, not in *Admin > Extensions > Modules*.

This extension provides a discount for any customer referred by any affiliate.

This discount can help affiliates promote your products by motivating their referrals to use their affiliate links with no additional effort, since the discount is very powerful incentive.

You can set up global default discount, and you do not have to configure it for every affiliate separately. But you also can set individual discount amount and type (fixed or percentage) for certain affiliates on *Admin > Edit Customer* page – Affiliate tab. You can exclude certain affiliates by setting their amounts to 0, or allow discount to certain affiliates only by setting default discount to 0.

The discount is flexible and has many options:

- Can be percentage-based or fixed amount
- For fixed amount, you can configure a limit, so that the discount is never higher than certain % of product price – useful for very cheap products, and also apply it to whole order or each item individually
- You can offer the discount on the first customer's order only, on all customer's orders, or periodically

- Discount can be calculated from total order price, most or least expensive product only, and can take into account or ignore product's quantity
- You can also choose not to apply this discount when coupon is used. For that to work, Sort Order for Coupon Order Total must be less than Tracking Discount's Sort Order
- You can give discount to users who were referred by affiliates, or who came via your Marketing Campaign links, or both

To change the text that describes this discount in the lists of Totals (in the cart, checkout etc.), edit language file: **language/en-gb/extension/total/tracking_discount.php**.
As with any other language file, to translate it, copy language/en-gb/extension/total/tracking_discount.php to language/<your language directory>/extension/total/tracking_discount.php.
